

WATERPROOFING SOLUTIONS

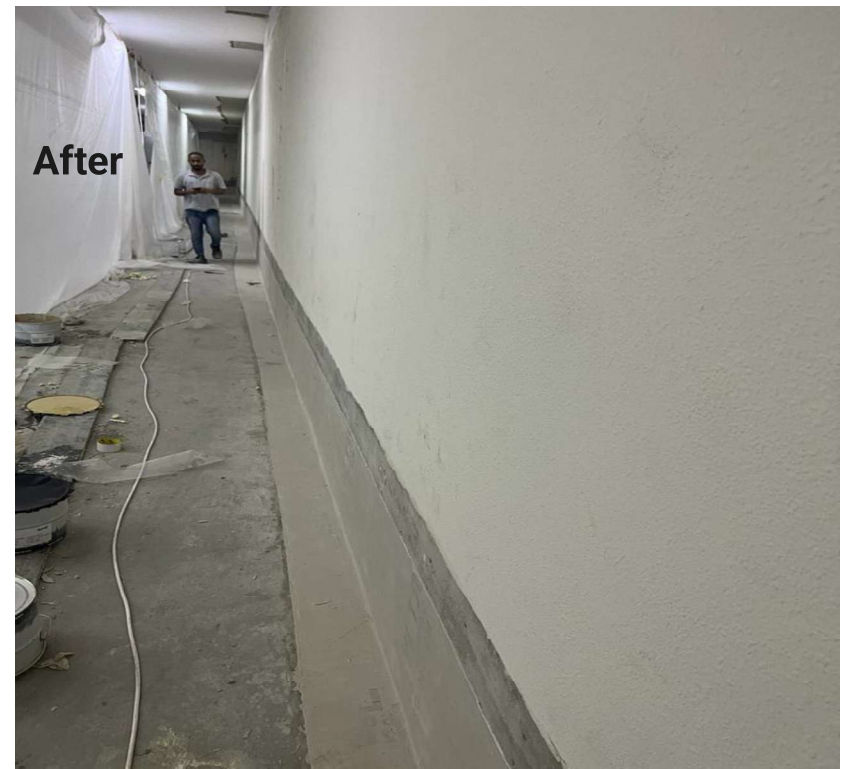

Basement Waterproofing

Steps:

- Surface preparation
- PU Injection where needed
- Apply **SS BOND MTN** System

Basement Waterproofing

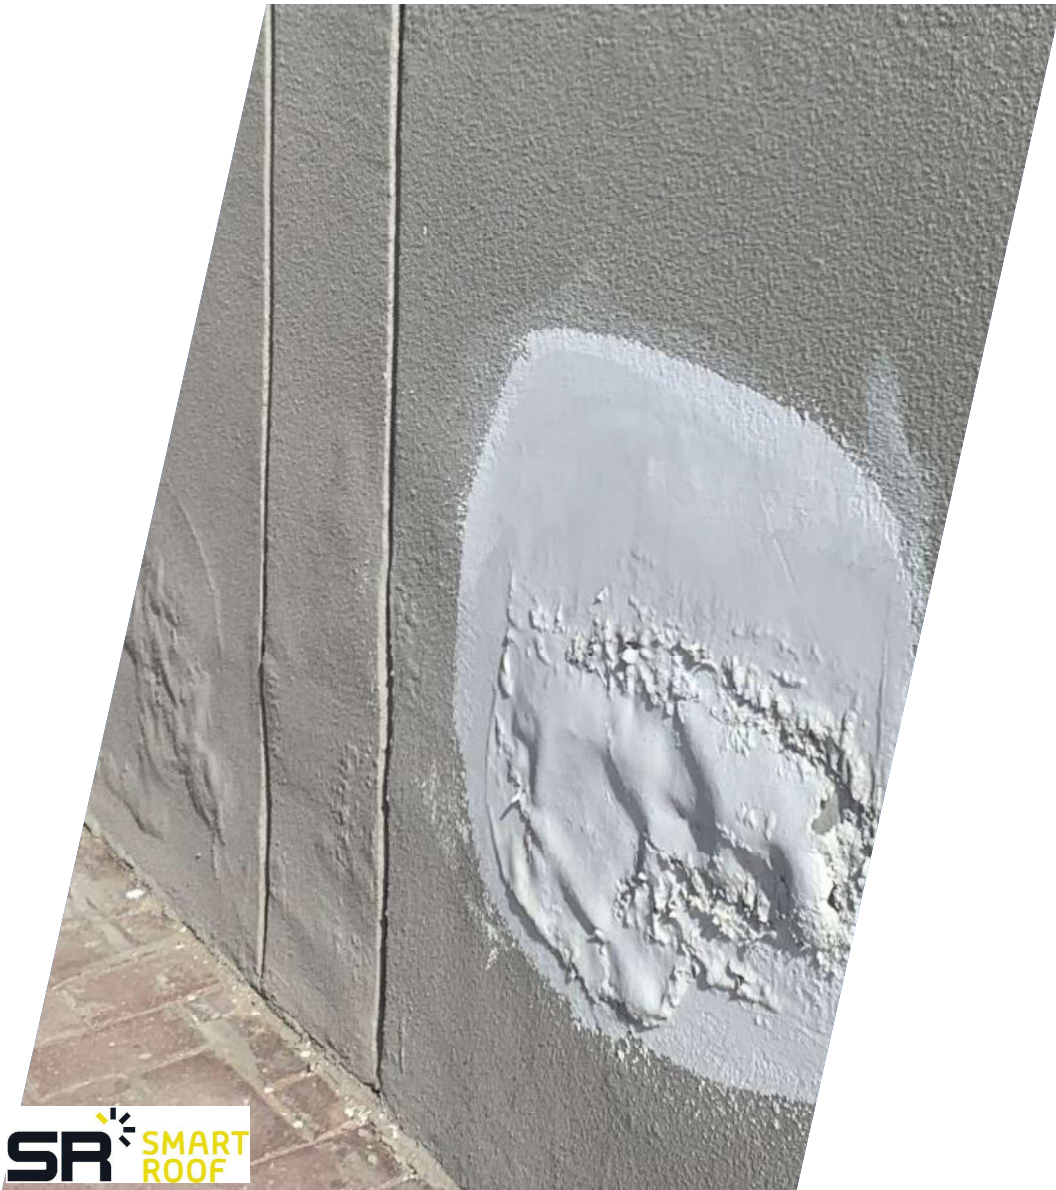

Capillary Waterproofing Solutions

CAPILLARY ISSUES

- Proper damp proofing is a must in the region due to low water table levels and conditions of the soil.
- Once a capillary appears – negative waterproofing is the only permanent solution.

Damp Proofing Solutions – SR COAT DP20 / WP20

- For capillary issues at site
- Negative waterproofing for damp rise / dampness.
- Solves your paint – peeling off issues.
- 5-year guaranteed protection.
- Easy application.

- Mold & fungi free walls.
- Paintable on top, so can achieve any color requirements.

Wet-area Waterproofing Solutions

WET AREA WATERPROOFING
WA 110/210/310

Wet Area Waterproofing

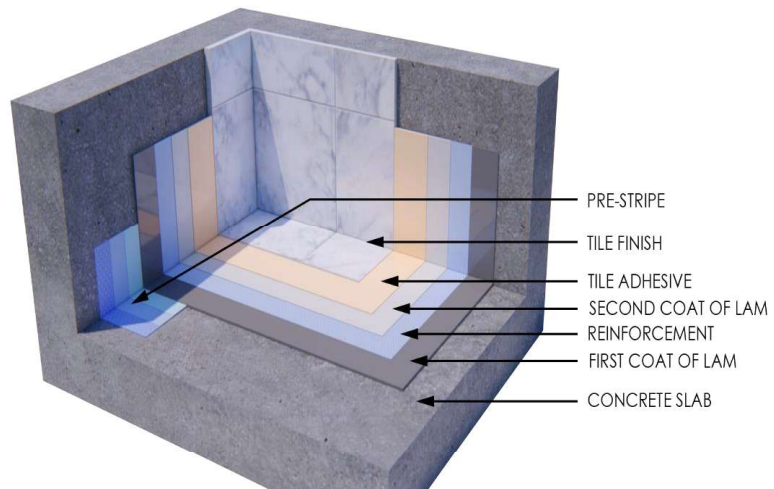

UNFORTUNATELY, WET AREA WATERPROOFING IS NOT TAKEN SERIOUSLY IN THE REGION.

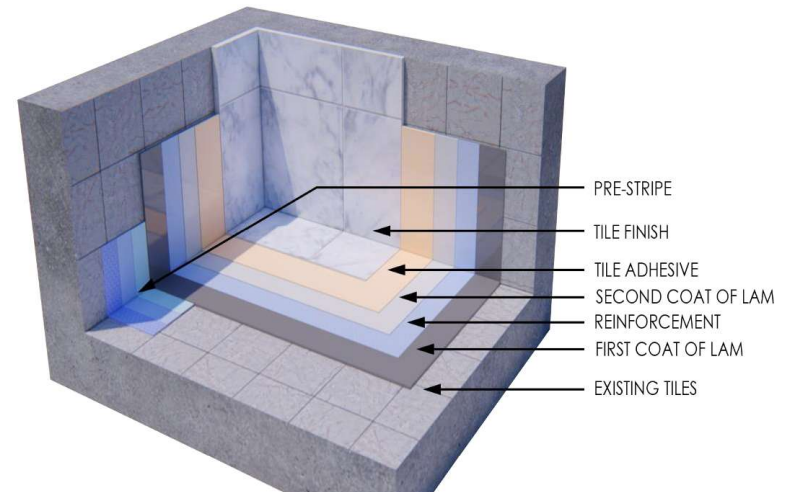

- Proper waterproofing with primary and secondary back up is way cheaper than costly repairs.
- 90% of the problem is related improper treatment to pipe penetration.
- Adhesion of selected waterproofing to PVC pipe is so critical in getting the waterproofing right.
- This is what we call primary back up and then a selected waterproofing can be applied over the entire surface.

SR COAT MTR 50

Textured Urethane Acrylate Waterproofing Coating

- Recommended for wet-area waterproofing
- 2K water-based coating.
- Moisture-tolerant (can be applied on wet surfaces).
- Excellent adhesion to all substrates (metal, tile, bitumen, glass, concrete, green concrete).
- Breathable.
- Long pot life - up to 6 hours.
- Excellent mechanical properties.
- Textured surface finish.

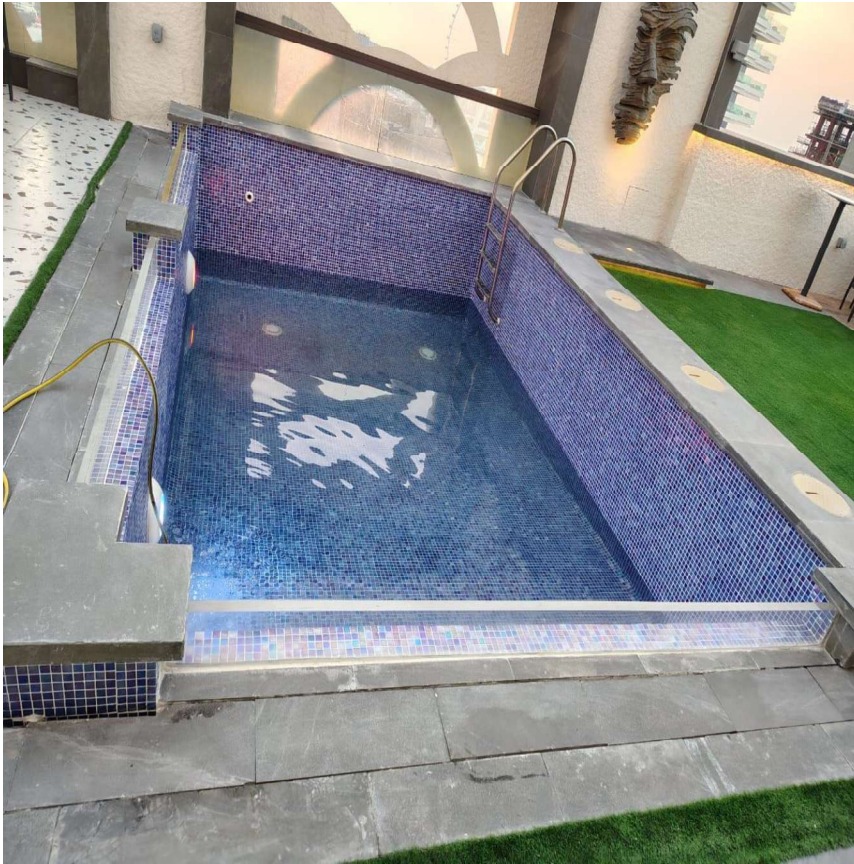

SR COAT MTR 50 – Adhesion to PVC pipes

SR COAT MTR 50 – Wet area waterproofing

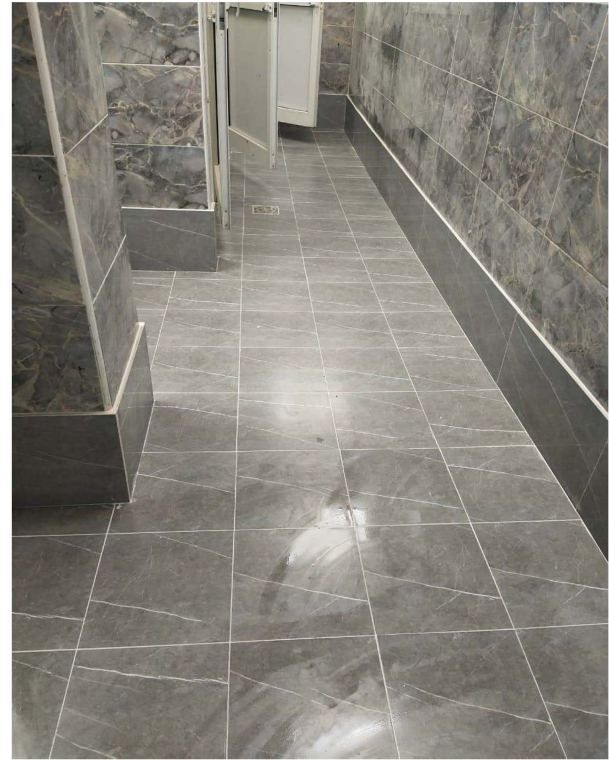

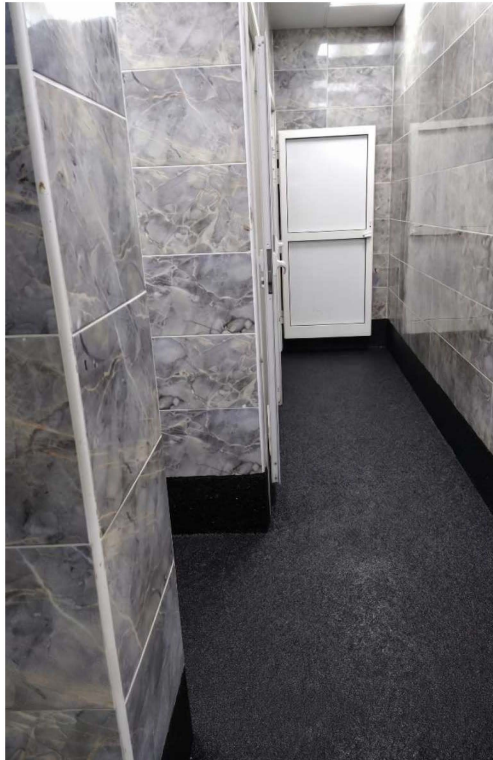

SR COAT MTR 50 – Swimming pools waterproofing

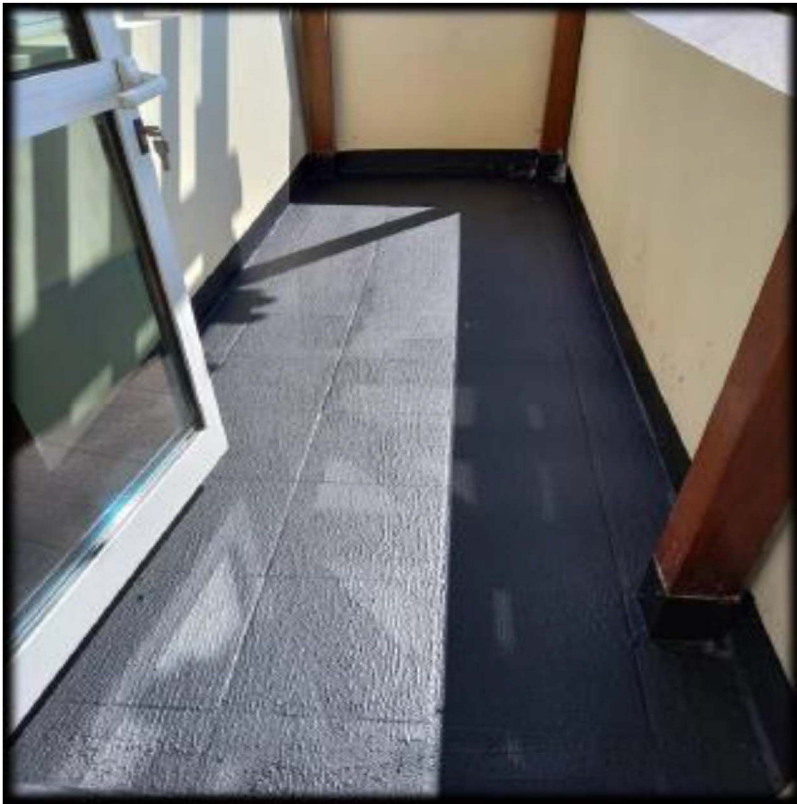

SR COAT MTR 50 – Swimming pools waterproofing

SR COAT MTR50 - Wet area re-waterproofing [tile on tile]

SR COAT MTR50 – Balcony re-waterproofing [tile on tile]

SR FLEX XL

Commercial-Grade Cementitious Waterproofing Coating

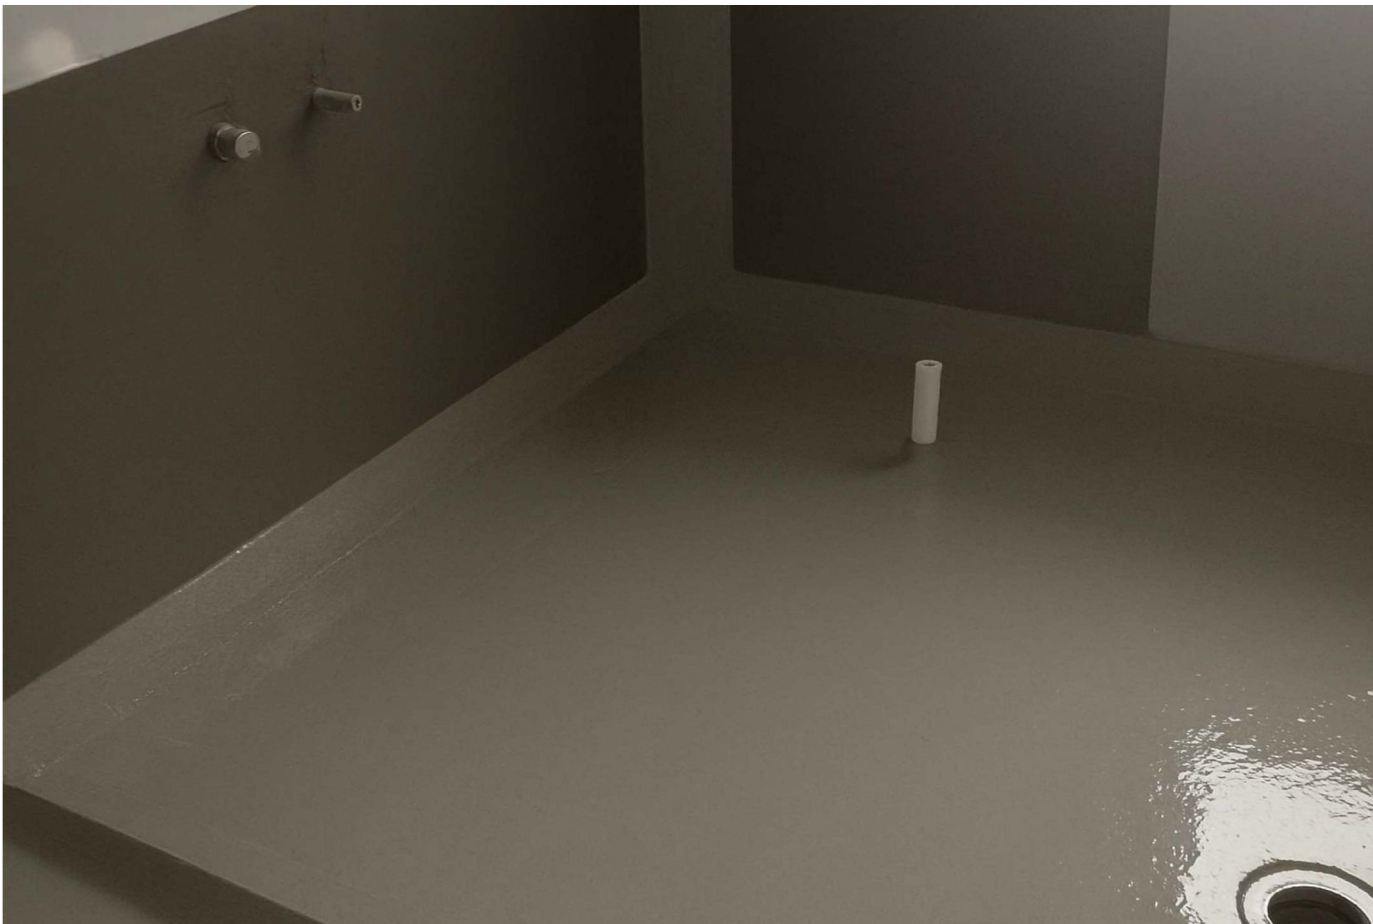

- 1:1 mixing ratio.
- 20 ltr. mixed volume.
- Polymer rich.
- Long pot life - up to 6 hours.
- Flexible yet tough.

Waterproofing of :
Swimming Pools, Wet Areas, Kitchen,
Balcony, Planter Box, roofs.. etc.

Roof Waterproofing Solutions

ROOF GARDEN SYSTEM
RS-125

SR COAT MTX / MT

Hybrid Urethane Acrylate Waterproofing

- 2K water-based system.
- Tough yet flexible coating.
- Moisture-tolerant (Can be applied on wet surface).
- Excellent adhesion to all substrates (metal, tile, bitumen, glass, concrete, green concrete, EPDM, TPO, PVC, etc).
- Breathable.
- Long pot life - up to 6 hours.
- Long life term.

SR COAT MTX / MT

Hybrid Urethane Acrylate Waterproofing

Moisture tolerance of MTX.....

SR COAT MTX / MT

Hybrid Urethane Acrylate Waterproofing

Excellent bonding to Green Concrete...

SR COAT MTX / MT – Perfect Maintenance Solution

before

after

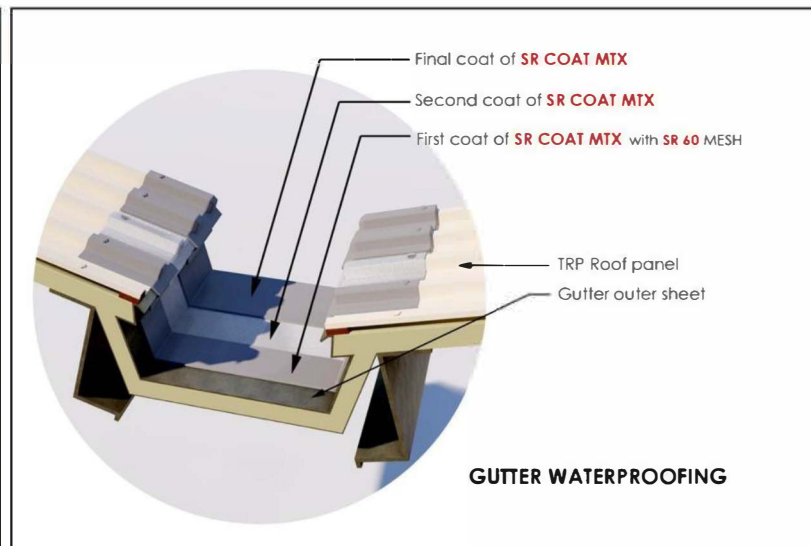

- One coating for all surfaces/solutions
- Excellent adhesion to all substrates (metal, tile, bitumen, glass, concrete, green concrete)

SR COAT MTX / MT – Perfect Maintenance Solution

Over existing terrazzo tiles...

SR COAT MTX / MT – Applicable on Metal Roofs / Gutters

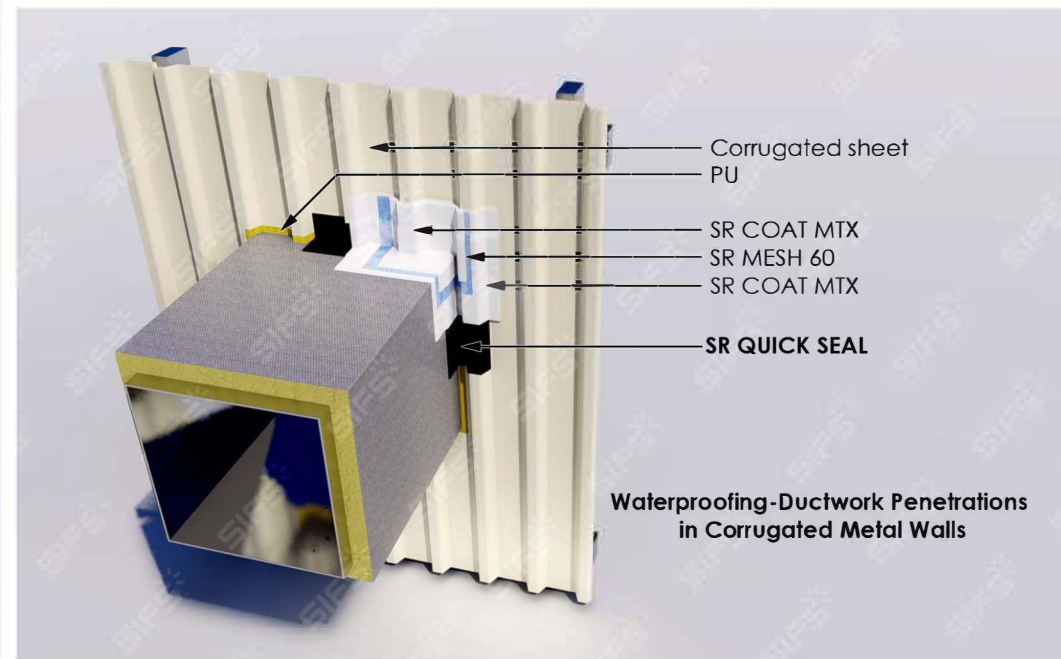

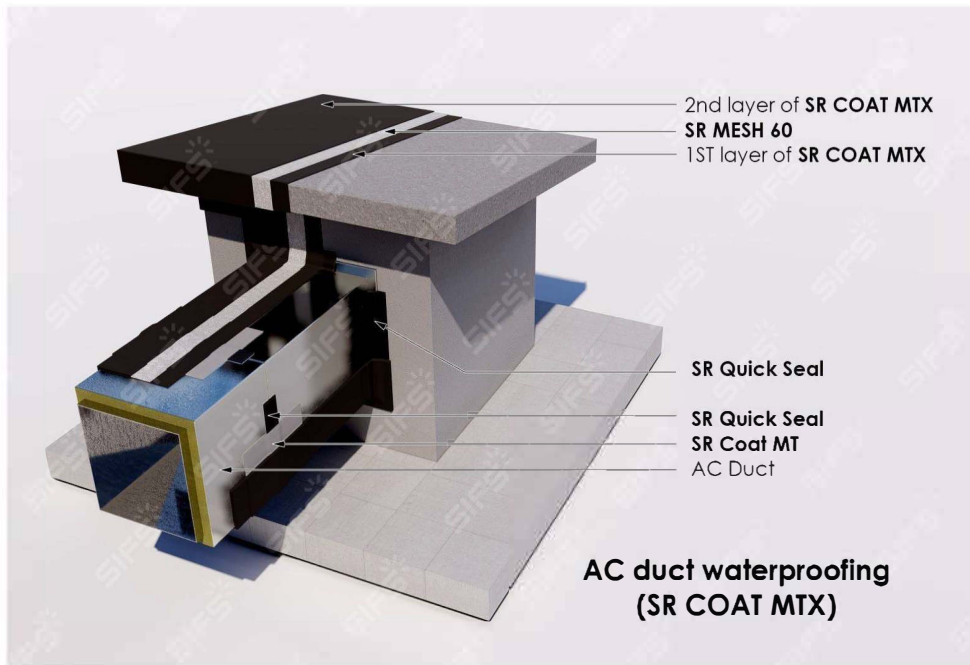

Metal roof sheet waterproofing

SR COAT MTX / MT – Applicable on PU FOAM

SR COAT MTX / MT – Perfect Maintenance Solution

For sealing gaps between penetrations/ openings...

SR COAT MTX / MT – Perfect Maintenance Solution

SR COAT MTX / MT – Perfect Maintenance Solution

SR COAT MTX / MT – Perfect Maintenance Solution

POLYURETHANE

SR COAT PU

Polyurethane Waterproofing Coating

SR COAT PUD

Polyurethane Dispersion Waterproofing Coating

SR COAT PU270 / PU370

Single-component PU waterproofing coating

SR COAT TC

Flow-applied Flexible Polyurethane Topcoat

SIFS

ACRYLIC

SR COAT

Acrylic Waterproofing Coating

SR COAT is a single-component, high-quality acrylic waterproofing coating with excellent adhesion. It is applied as a liquid and cures to produce a highly elastic waterproofing membrane with strong adhesion to many substrates. It is based on high-grade acrylic polymers and fillers, resulting in excellent mechanical, chemical, thermal and UV-resistant properties.

Application Areas:

- New or existing concrete roofs.
- New or existing metal roofs.

Features

 Easy application

 LOW VOC

 UV resistant

 Excellent adhesion

Type	Unit of Measurement
PU	KG

MAINTENANCE – PATCH & REPAIR SEALANT

- SR Quick Seal is a general-purpose patch and repair sealant
- Works under all weather conditions - wet or dry.

MAINTENANCE – PATCH & REPAIR SEALANT

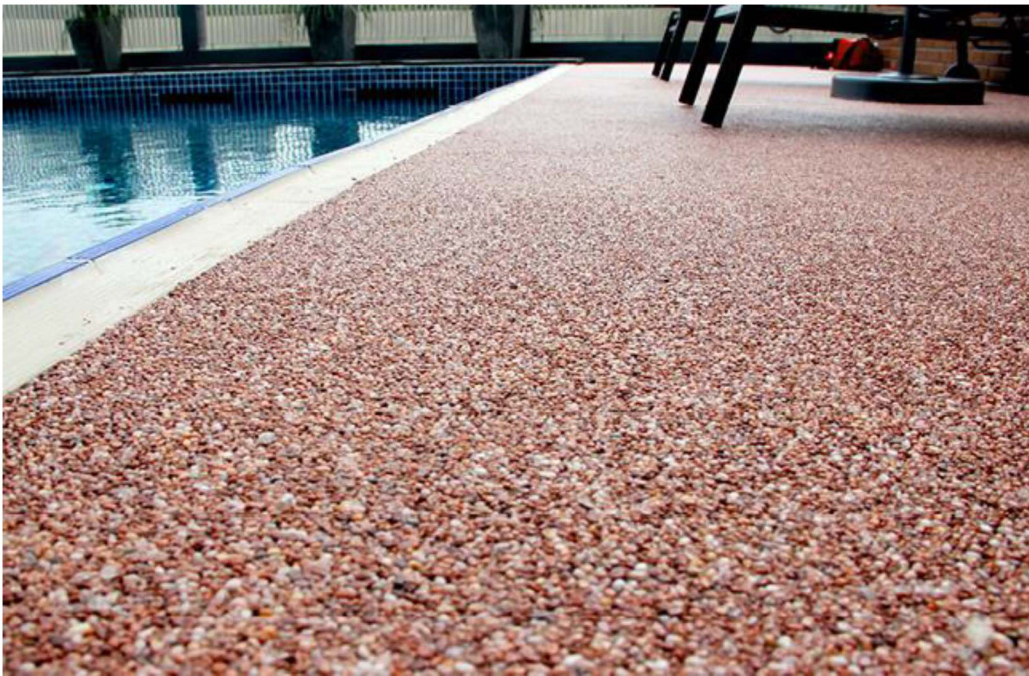

Flooring Solutions

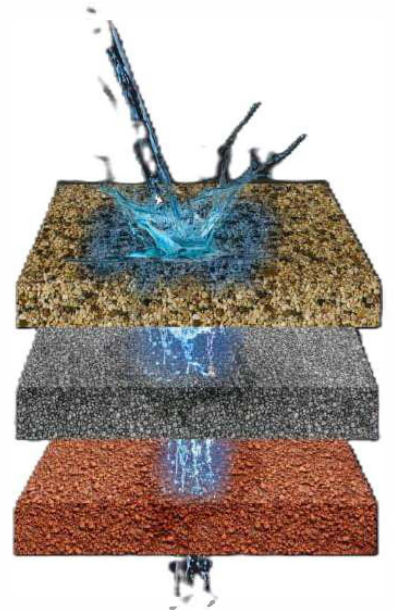

FLOORING/WALKWAYS
WW 110 PU FLOOR COATING
WITH LEVELLER
WW 120 PU SCREED
WW 130 RESINOUS FLOORING.

SF RESIBOUND - Resin Bound Stone Surfacing

- Walkways / Pool deck
- Self draining
- Lower temperature
- Seamless floor
- Design capabilities
- Long lasting

SF RESIBOUND - Resin Bound Stone Surfacing

- Permeable
- Durable
- UV Resistant
- Aesthetic appeal
- Slip resistant

SF RESIBOUND - Resin Bound Stone Surfacing

SF DECK CP / Toughcoat - Deck Coating Systems

- A high-build coating providing high-quality resistance to abrasion, chemical attack, and other forms of physical aggression.
- Excellent Coverage: Formulated for high-performance application over broad areas.
- Impact Resistant: Built to withstand physical impacts and heavy usage.
- Smooth Finish: Delivers a uniform, clean surface texture.
- Easy to Clean: Simplifies maintenance and washdowns. (low surface tension)

STANDARD DUTY POLYURETHANE FLOORING
